

Certificate of Origin

Description of Product

Hippex is a high-quality equine semen extender or preservation medium that contains pharmaceutical and analytical grade ingredients.

Hippex is delivered as a powder in small, sealed pots that contain 22.5 gram powder for the preparation of 250 ml semen extender. Hippex powder is also delivered in bulk quantities in container containing 4.5 kg powder.

Hippex powder has been micronized in order to deliver a powder that will dissolve easily in warm water without lump forming.

Hippex contains the antibiotic gentamicin (0,20 g/l) and penicillin (0,04 g/l), what are recommended for use in semen extenders for cooled storage and transport.

Hippex is being manufactured and packaged in Pelt, Belgium.

The authorizing official hereby acknowledges the specified country of origin of the product listed above.
